RESEARCH AND PUBLICATIONS

Media Bias in Presidential Election Coverage
A Meta-Analysis joint paper with Dr. David D'Alessio

Character Traits and Presidential Candidates
Bivariate Linear Regression Model individual project

CERTIFICATIONS

Microsoft Excel for Data Analysis, Codecademy

DEVELOPER EXPERIENCE

KNAYAD-REACT

Redesign portfolio, Jan 2023 – Present

Tools: React.js, JavaScript, Bootstrap, GitHub API, CSS, HTML, MongoDB, Spline, Font Awesome, Slick Slider, Google Fonts

Created components in React.js, incorporating Bootstrap.

Created functions for ease of use and UI with JavaScript (ES6); including arrow functions.

Utilized CSS throughout the website for customization, in addition to Google Fonts and Font Awesome.

Created Spline avatar with the capability of following the cursor and Easter egg state changes of the Spline itself.

Additional components from Slick Slider and React PDF Viewer were customized.

Created a database of peer reviews with JSON format to be linked to MongoDB.

PYTHON PASSWORDS

Aug 2023 – Oct 2023 (update)

Tools: Python, Tkinter

Created a password generator using strictly Python with Tkinter as a dependency.

The generator allows for two variables for password creation: length and repeat characters.

Utilized Python for the UI, creating a "retro" feel.

NADIA.GITHUB.IO

Jul 2021 – Jan 2022

Tools: JavaScript, HTML, CSS, Single Page Application (SPA)

First Single Page Application (SPA).

Successfully set up GitHub Pages.

Utilized only raw JavaScript, HTML, and CSS.

Bootstrap components were incorporated.

Utilized Font Awesome and Google Fonts

Basic understanding of Agile.
